

Magni M22 Voyager – first production aircraft (2005)

First M22 Voyager built in 2005 by Magni Gyro within the "Italy Aerotouring Flight Guide" and "Germany Aerotouring Flight Guide" programmes. Designed and operated as a true long-range touring gyroplane.

Powered by Rotax 914 ULS (s/n 4418773) with original ARPLAST GL170/3 propeller. Total time: 994 hrs. Single owner since new.

Excellent overall condition, professionally maintained in terms of airframe, engine and systems. All maintenance documented and certified, carried out by authorized facilities: Luciano Sorlini S.p.A., Microflight (Andrea Minari), Magni Gyro.

Only 94 flight hours since last major maintenance and overhaul cycle (engine and mechanical systems).

Equipment: TRT800H OLED transponder (Mode A/C/S), Funkwerk ATR 500 radio, Rami AV-14 antenna. Communication systems installation, testing and certification performed by Luciano Sorlini S.p.A. Digital MAV altimeter. Three power outlets (front and rear).

32.500,00 Euro - Price negotiable.
